## Jorgensen Land & Cattle

Welcome Cattlemen & Cattlewomen.

Thank you for joining Jorgensen Land & Cattle at Livestock Exchange in Brush, CO on April 3rd, 2025 at 1:00 pm MT. We first began selling **SMARTBULLS**<sup>®</sup> nearly 20 years ago and their popularity among cattlemen continues to grow because they have the capacity and age to breed your cows without a bunch of pampering. In addition, cattlemen can breed more cows with fewer bulls than if they use younger bulls.

All of the bulls in this sale will have a suite of EPDs generated by the **IDEAL BEEF EVALUATION (IBE)**. This increases the genetic predictive power of our **SMARTBULLS**<sup>®</sup> and **AgBoost**<sup>®</sup> helps us communicate that data visually to cattlemen. **All EPDs displayed in this catalog are Ideal Beef Evaluation EPDs.**

The **IBE** is a proprietary genetic evaluation that was developed through the cooperative efforts of Jorgensen Land & Cattle and Zoetis. It combines the vast phenotypic data set (performance, calving, ultrasound, and reproduction) of Jorgensen Land & Cattle, with the genetic and analytical teams of Zoetis — along with their gold standard HD50K genomic test. We are extremely excited about the insights that the Ideal Beef Evaluation provides. These insights help us provide more accurate genetic recommendations to our customers.

Please check-out the section on our Feeder Calf Listing and Feeder Calf Buy Back Programs that we offer.

We want to express a big “Thank you” to our customers, family and friends for their continued support and belief in our Jorgensen Land & Cattle breeding program. We appreciate each of you!

We look forward to seeing you at Livestock Exchange in Brush, CO on April 3rd.

Give us a call at 800-548-2855 or email us at [info@jorgensenfarms.com](mailto:info@jorgensenfarms.com).

Thank you for your interest in our program.

The Jorgensen Family

## Greg Jorgensen

### The “Father” of SmartBulls®

The Jorgensen family has been selling bulls into Florida & the South for at least 55 years, with the first notable bull being “Algoma 46”, who was sold to Suwanee Farm (Live Oak, FL). He was an early Certified Meat Sire and was co-owned with American Breeders Service.

Throughout the early years, those original Rito-, Algoma-, & Skymere–bred bulls demonstrated that they were performance-sires and that they could handle the heat of Florida and other southern states. Those heat tolerant & early hair shedding traits are woven throughout the today’s Jorgensen bulls, as is selection for performance traits.

Today, the popularity of Jorgensen SmartBulls® is rapidly growing, but like most successful products there was a learning curve. Around 2006, Greg & his wife Deb began to spend their winters in Florida, visiting with customers and meeting cattlemen. As Greg began became acclimated to the Southeast, he realized that 30-month old bulls would be ideal for southern cattle operations. These older bulls would be physically mature, would have their permanent teeth, and able to maintain themselves on pasture.

Greg Jorgensen  
Partner, Jorgensen Land & Cattle

Over the next decade, Greg & the Jorgensen family found ways to improve the quality of the bulls that they were bringing to cattlemen across the Southeast. They improved foot & leg structure, performed genomic testing of the bulls, worked with Zoetis Genetics to develop their own genetic evaluation generating GEPDs for each of the bulls. They also stretched the rumen of the bulls so that they had increased gut capacity to consume plenty of forage & stay in good condition in breeding season.

One thing still bugged Greg, “What do you call these experienced, mature bulls that cattlemen really like, once they try them?” Greg settled

on “SmartBulls” and it fits. SmartBulls® are a smart choice because these bulls are experienced breeders, they are physically mature and can maintain their body condition by consuming forage, they have passed multiple Breeding Soundness Exams, and they have 60+ years of Jorgensen breeding & selection bred into them.

Greg, like his father, has vision and the determination to see things through to success. However Greg couldn’t have done this by himself; Greg’s best partner in this effort is his wife, Deb. Greg can’t say enough good things about Deb and her contributions to his success. She was just as determined for this project to be successful as Greg. While she loves Florida winters and their Florida friends, it is a sacrifice for her to give up time with their children & grandchildren, but she is there by his side, every year.

Thank you, Greg, for your vision, dedication, and work. Thank you, Deb, for your dedication & willingness to miss the many birthdays & ballgames of your grandkids during your time in Florida, to help Greg introduce his SmartBulls to America.

**Jorgensen Land & Cattle**

## **AMERICA'S #1 CHOICE FOR BULLS**

Each & every year, Jorgensen Land & Cattle has been confirmed as the nation's largest supplier of beef bulls according to the **BEEF Seedstock 100 List**.

Jorgensen Land & Cattle earned their reputation as "The Source" for foundation genetics – the kind of genetics that you use to build a cow herd. We earned that reputation by consistently selecting our breeding stock based on –in this order– reproduction, fast growth, and a desirable carcass. Those three factors have been foremost in our breeding & selection criteria throughout our past 60+ years. Consistent testing, systematic selection, and discipline, generation after generation, have built our foundation breeding program. Our breeding program creates bulls that produce uniformity in the calf crops of our customers.

As you examine our catalog, be sure to notice the generations of consistent performance that have been stacked on top of each other.

We are **America's #1 Choice for Bulls** because we do the right things and we do them consistently – generation after generation after generation.

# Power Your Herd

*with*

With a simple DNA test, we can help you select bulls to breed your cows .

## **IBG<sup>TM</sup>**

**uses 3 Custom Indices from the  
Ideal Beef Evaluation to make  
genetic decision more simple:**

### **JVIH**

**Index for selecting heifer bulls**

### **JVIM**

**Index for selecting cows/bulls with  
optimal maternal and performance traits**

### **JVIT**

**Index for selecting cattle with optimal  
feedlot/carcass traits for those herds that  
don't keep replacement heifers**

## **GEPDs Include**

- Birth Weight
- Weaning Weight
- Yearling Weight
- Docility
- Milk
- Fertility
- Scrotal Circumference
- Dry matter Intake
- Feed Conversion Rate
- Average Daily Gain
- Intramuscular Fat
- Ribeye Area
- Fat Thickness
- Tenderness

## Individual Performance Data

**BW:** Individual's Birth Weight .

**WW & Ratio:** Weaning Weight adjusted to 205 days of age. WW Ratio indicates pre-weaning growth relative to contemporaries. 100 is Average.

**YW & Ratio:** Yearling Weight adjusted to 365 days of age. YW Ratio indicates post-weaning gain relative to contemporaries in this sale. 100 is Average.

**ADG:** Average Daily Gain during the test feeding period & measures the growth rate of individual bull calves on feed.

**The Jorgensen Versatility Indexes** are multitrait tools, developed to help rank bulls suitable for use on Heifers (**JVI-H**), for use on Cows (**JVI-C**), and for producing more value in the carcass (**JVI-T**).

**JVI-H:** A combined Index of traits that helps simplify selection for bulls that are better suited for use on heifers, where lower Birth Weight has more impact than growth, Milk, or carcass. Higher numbers are better. Bulls with individual BW greater than 85 lbs or a BW EPD greater than 2.5 receive a JVI-H mark of **Not Recommended** for heifers. You can use your judgement to balance bulls with higher JVI-H scores along with their BW EPDs.

**JVI-C:** The JVI-C index reduces the impact of BW and increases the impact of growth (WW & YW), Milk, SC, & carcass traits. Higher JVI-C scores indicate better overall genetic merit; higher scores indicate better performing calves.

# Explanation of Performance Records Provided through the

## EPD & % Rank

EPDs are calculated in the Ideal Beef Evaluation through work with Zoetis Genetics, and are current as of 9/13/22. % Rank tells you how that animal's EPD ranks against all of the other animals within the Ideal Beef Evaluation; it is a relative term. Lower percentages are better.

- 1) **BW:** Prediction of the sire's probable influence on Birth Weight of his calves; expressed in pounds.
- 2) **WW:** Predictor of a sire's ability to transmit pre-weaning growth to his calves; expressed in pounds.
- 3) **YW:** Predictor of a sire's ability to transmit growth to his calves; expressed in pounds.
- 4) **SC:** Predictor of a sire's ability to impact the scrotal size of his calves; expressed in centimeters.
- 5) **MILK:** Predictor of a sire's genetic merit for milk production in his daughters; expressed in pounds of calf weaned due to milking ability of his daughters.
- 6) **IMF:** Predictor of the difference in a sire's calves for Percent Intramuscular Fat (IMF) in the ribeye. Percent IMF is the common ultrasound term for Marbling and higher numbers are indicative of higher Carcass Quality Grades.
- 7) **REA:** Predictor of the difference in ribeye area of a sire's progeny; expressed in square inches.
- 8) **RIB:** Predictor of the difference in Rib Fat Thickness of a sire's progeny.
- 9) **AgBoost:** An additional index that where each trait is weighted equally and the values for each individual traits are presented visually in a pie-chart around the composite score (center of the wheel). A score of 5 is considered average, similar to 100 being

Jorgensen Land & Cattle

IDEAL  
BEEF GENETICS

# **Feeder Calf Listing and Feeder Calf Buy Back Programs**

**There is a lot that goes into producing great beef. Genetics is part of it, but it also requires a cattleman to calve the cows and put in the time & effort to make sure that calves are properly vaccinated & cared for. Both of those have to happen for those genetics to be their best in the feedlot and on the plate.**

**Jorgensen Land & Cattle is committed to helping our customers get full value for the genetics and all of the work & care that they provide for their cows and calves.**

**We like to buy back Jorgensen sired calves. The performance data from the feedlot and the carcass data from the rail go into our genetic evaluation, and help us to make better informed decisions in our breeding program.**

**As you make plans to sell your Jorgensen sired calves, please let us know. We will tell our feedlot partners about your calves, and when we have the capacity, we will do our best to bid on your calves and try to buy them.**
